

Mighty Matt™

the classic solution
for project restoration

MIGHTY MATT

Automotive Thermal and Acoustical Insulation

Mighty Matt™ is a dual purpose insulation mat designed especially for automotive after-market applications.

Mighty Matt is comprised of a mechanically bonded glass fiber insulation blanket on one side and glass reinforced aluminum foil bonded to the other side. The combination of these high performance materials yields an insulating blanket that is low cost, easy to handle, and strong enough to be called Mighty Matt. It has impressive thermal and acoustical properties and offers superior performance in operating temperatures up to 1000°F.

Class up your classic with Mighty Matt! For more information contact your dealer.

Characteristics:

- Low thermal conductivity at temperatures to 1000°F (538°C)
- Good drapeability — conforms to irregular surfaces
- Non-respirable, 9 micron filament diameter
- Excellent vibration resistance, will not powder
- Excellent sound absorption properties (NRC available upon request)
- Non-alkaline (<0.01%)
- Low chlorides and fluorides
- Will not contribute to metal corrosion
- Odorless—will not decay or sustain mold or vermin
- Moisture absorption negligible

Roll of Mighty Matt

Applications:

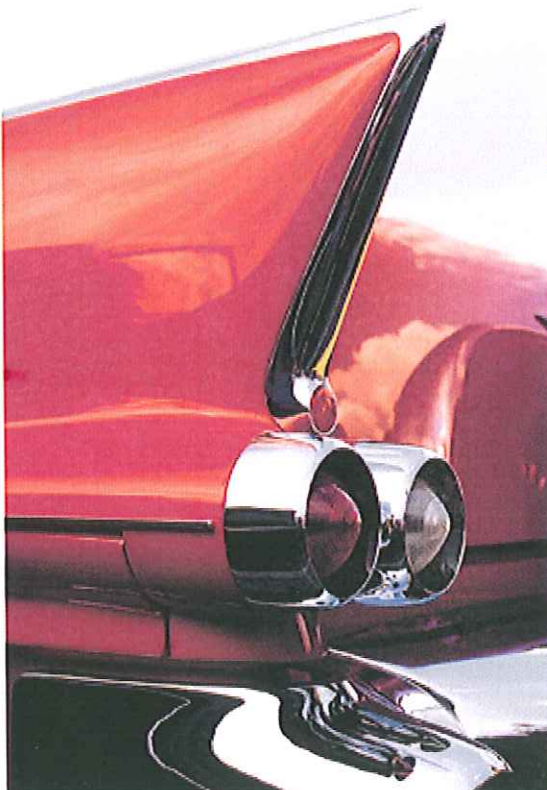

Glass Reinforced Foil Backing

- Floor pans
- Firewalls
- Door and quarter panel lining
- Trunk lining
- Roof lining
- Exhaust wrap
- Fuel line wrap

Installation Tips:

- Cut Mighty Matt to fit area to be covered
- Clean and remove all grease and loose debris from area
- If using adhesive, follow manufacturer's instructions
- Place Mighty Matt in desired area, foil side up, and conform to exact fit.
